# Mega Financial Holding Co., Ltd. 2015 Business Report

The global economy was not as good as expected in 2015, mainly due to the sluggish economic recovery of the advanced countries, slipping international oil and commodity prices, and the decline of economic growth in emerging and developing countries, of which the impact of China's sluggish economic growth was the most severe. According to IMF announcement in April 2016, the global economic growth rate was 3.1% in 2015, a 0.3% decline from 2014. The global economic growth of this year is forecasted to continue the trend of slow growth of recent years. In addition, there remain risks to be aware of, including a further slowdown in China's economy, divergent and uncertain monetary policies of central banks around the world, capital outflows of emerging markets, debt crises, and geopolitical troubles.

In terms of domestic economy, the annual growth rate of exports in 2015 exhibited a negative result for eleven consecutive months, of which eight months ended up with a double-digit decline. This was mainly due to the impact of weak international market demand, the rise of Chinese supply chain, the continued consumption of semiconductor product stock, and the continued decline in oil and steel prices. Therefore, domestic demand has become the main support of economic growth momentum. According to the statistics revealed by the Directorate-General of Budget, Accounting and Statistics, Executive Yuan, in February 2016, the 2015 economic growth rate was 0.75%, failed to maintain the 1%, setting a record low since the financial crisis in 2008. Due to the increasing downward risk of global economy, if the global economy reverses downward rather than recovers as expected, Taiwan's economic recovery pace will be affected in 2016.

Under the influence of domestic and international negative factors, Taiwan's economy in 2015 had shown a trend of gradual decline. In this difficult environment, the profitability of financial institutions were inevitably affected. Fortunately, the Company posted outstanding performance thanks to the consistently sound operating principle, the solid business foundation, and the strict risk control. In 2015, the Company's consolidated net income after tax was NT\$29,273 million, declining NT\$986 million or 3.26% growth from 2014, while after-tax EPS was NT\$2.35, making us a top performer among financial holding companies. The operation results of the Company in 2015 are shown below.

The Company's consolidated net profit before tax in 2015 was NT\$35,329 million, a drop of NT\$244 million or 0.69% compared to 2014.
